

25/30D 35DN-9V

5,000 / 6,000 / 7,000 lb. capacities

Diesel · Pneumatic Tire

HYUNDAI

MATERIAL HANDLING

NO ONE DELIVERS MORE

MORE POWER.
MORE EFFICIENCY.
MORE VALUE TO LIFT
YOUR ENTIRE BUSINESS.

Get more of what you're looking for: THE 9V SERIES FROM HYUNDAI

Engineered to handle the toughest jobs in the most extreme conditions, the 9V Series brings you a powerful, eco-friendly Hyundai diesel engine that meets the nation's toughest emission standards. But strength with lower emissions is only one advantage. More performance, more convenience, simplified maintenance, and enhanced ergonomics all add up to workhorse machines that can lower your costs while raising your profits.

Reliability, durability, economy, that's what you'll find in the innovative 9V Series from Hyundai.

EFFICIENT, LOW EMISSION HYUNDAI-BUILT DIESEL

The powerful Hyundai DM02 diesel delivers superior performance with high torque at lower rpms, all while meeting EPA/CARB Tier 4 regulations. It also brings you:

- Advanced BOSCH common rail fuel system with Electronic Engine Control Unit for greater efficiency
- Hydraulic Lash Adjuster (HLA) eliminates costly valve clearance checks while delivering quieter operation and longer engine life
- Simplified maintenance with remote type oil filter cuts downtime and operating costs

INNOVATIVE HYUNDAI-BUILT TRANSMISSION

Engineered by Hyundai to be a perfect match to our high performance engine, the new transmission provides smoother, reliable operation and so much more:

- Clutch pack capacity and oil volume increased to help protect against wear and heat damage
- Advanced Direction Change Shock Relief (DCSR) is precisely managed by the Master Control Unit (MCU) and reduces wear & tear and forward/reverse starting shock by 36%
- Auto parking brake engages if the operator leaves the seat or if the key is turned off

RUGGED HYUNDAI DRIVE AXLE

This advanced, rugged system is designed for years of reliable service. Noise is reduced thanks to an innovative ring gear incorporated in the hub reduction system. Durability is improved through the added strength of the gears composing the bevel, pinion, and differential assembly. In addition, the wet disc brakes offer smoother response and more consistent braking with reduced maintenance intervals.

LARGE, INFORMATION RICH DIGITAL CLUSTER

Our multi-function cluster puts essential information right in front of your operators. Fully integrated with the MCU (Master Control Unit), the new cluster comes standard with maintenance alarms, operational indicators, and safety alerts, including incline/slope warnings, load weight indicator, and OPSS (Operator Presence Sensing System). It also offers ready access to the auto park brake and Direction Change Shock Relief.

The 9V Series brings you even more advantages.

- Outstanding maneuverability and with our optional 3-stage mast greater visibility all around the workplace
- A full suspension Grammer seat, hanging-type pedals, and easy handling steering wheel for operator comfort
- Optional heated cab redesigned for improved visibility and comfort, while shielding operators from the environment and can include an optional air conditioner
- Easy access to key maintenance areas with a floor plate and side cover that can be removed without tools and a hood supported by two gas struts. With the 9V Series cluster, engine status and issues can be checked without the need for a separate diagnostic tool
- Fuses and relays are protected in a box with enhanced water-proof and dustproof protection
- New German engineered Buchholz monoblock Main Control Valve (MCV) for improved control of hydraulic functions and fuel efficiency
- Operator Presence Sensing System (OPSS) restricts driving, lift, and tilting whenever the operator leaves the seat
- For maximum safety the auto parking brake is activated when the engine stops or the OPSS detects a fault
- The Hill Assist Control engages the auto parking brake when the forklift stops while climbing a slope or grade such as a ramp
- The Load Weight Indicator provides a digital readout of the load weight and warns if the maximum capacity is exceeded
- Optional seat belt interlock system restricts forklift operation when the seat belt is not fastened or the operator releases the belt while driving for even greater safety
- Hanging pedal design reduces operator fatigue while enhancing driving precision and can include an optional hydraulic boost brake pedal
- The small diameter of the steering wheel improves handling while also reducing the effort required to navigate the forklift

HI-MATE MANAGEMENT SYSTEM

Hi-Mate is one of the industry's most advanced remote management system. With continuous data collection, Hi-Mate delivers more communication, control, and ability to track, monitor, maintain, and manage your forklift fleet. It is the proven way to efficiently coordinate both your equipment and human resources.

ONLY HYUNDAI OFFERS YOU SUCH A COMPREHENSIVE, FULLY INTEGRATED TELEMATICS SYSTEM.

Hi-Mate works by collecting key data from sensors mounted to your equipment that track operation of the forklift, relaying that information to your computer or mobile device in real time. By monitoring key components, such as the engine, electric system, and hydraulics, Hi-Mate can help you evaluate machine and operator performance, create preventive maintenance programs, and help you minimize downtime as you maximize productivity.

HiMATE

Equipment operation management

Real-time monitoring and follow-up management of individual pieces of equipment or equipment fleet deliver essential operational status and information, including:

- Key-on time, travel hours, work hours, and GPS location

Equipment status management

Vital diagnostic and maintenance data is relayed as alerts, while Hi-Mate Premium provides tracking of pre-shift checklists to help reduce downtime and ensure OSHA compliance:

- Alerts are sent for DTCs, system warning, and required maintenance

Safe traveling control

An impact monitor provides alerts, accountability, and follow-up management of safety incidents involving equipment during operation:

- The system logs the number and severity of impacts as well as the operator who was logged into the unit at the time of the incident

Human resource management

Hi-Mate Premium can control who operates equipment via a pin pad and RFID reader:

- Provided information can be used to evaluate productivity, efficiency, and workforce safety
- Tracking the weight load indicator captures operator productivity
